

A leading global automotive major leverages KNOLSKAPE's blended learning program – Enabling a Future Ready Workforce – to reinforce leadership behaviors and competencies among its people!

CHALLENGE

The organization was looking for a training program that would enhance its people's skills, performance and productivity, and help strengthen their skill sets through immersive training.

SOLUTION

KNOLSKAPE's blended learning program - 'Enabling a Future Ready Workforce' - is based on the LOOP framework.

- > The program helped employees imbibe the LOOP framework necessary for leading themselves and leading change for successful business transformation.
- > The program also provided holistic, blended learning experience with comprehensive self-paced courses and talks by leaders of the organization to reinforce the learning.
- > The locations of the program were Jamshedpur, Sanand, and Mumbai.
- > Deputy General Managers, General Managers, and Senior Managers across functions took the program.

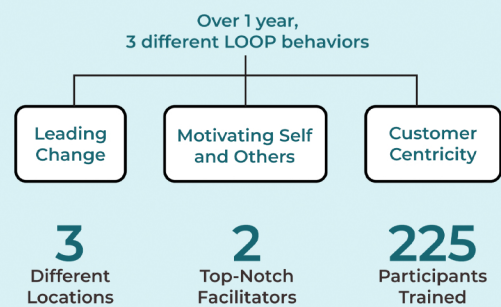

KNOLSKAPE's VALUE ADDITION

- > A comprehensive solution was recommended comprising technology, blended learning methodology, and robust analytics.
- > Virtual and on-demand access to learning – with Self-paced courses for strong foundational learning.
- > Experiential, gamified technology platforms for safe, social, and competitive learning.

PARTICIPANT TESTIMONIAL

"As I deal mostly with VIP users, everything is important and urgent. This training helped me to understand how to cater to my customer needs through the simulation test."

IMPACT

Average Feedback for Program: 9.16 / 10
